Let the quality show

Make the right choice of door

Your door is welcoming

Actually, the door is no more than access from outside to inside or reverse, but for most home owners, it is much more than that.

Doors and windows is an essential part of the expression of your home, where design, colour and construction provide yourself and your guests with a first impression of your home.

The right door must provide the resident with a nice feeling of quality and arriving at home, making it important to spend time choosing the right door.

Quality

Doors from Idealcombi are produced around one basic idea: It must be solid quality!

Quality and innovation are the keys to everything we do. We are working with quality in the development of innovative windows and doors, from the design to the delivery at the customer.

All the way through the choice and purchase of our products, our customers and home owners must feel sure about their choice - we simply want to produce the best windows and doors on the market.

Frame IC / Nation IC

Entrance doors

Inward and outward opening framed doors

Improved security, comfort and energy efficiency

All framed doors from Idealcombi are produced using low e glass, 3-point closure and security latches, but that is not all.

Espagnolettes are equipped with an extra hook bolt centrally by the lock, making the door highly resistant to burglary. Roll bolts at the top and bottom provide an improved inlet and higher comfort and user friendliness during operation.

Outward opening doors are now provided with a reinforced PUR insulation core in the frame, providing far better energy performance than traditional wooden doors. The threshold is, as standard, produced in pure composite for all doors, for further energy optimization.

Our doors are future-proof, energy wise, and with triple glazing, they are well above the requirements for energy performance.

... an entrance for every home

Frame IC / Nation IC

Flush panel doors

Inward and outward opening doors

**Same benefits as framed doors
- but with a smooth and beautiful surface!**

The door frames are the same construction as framed doors, providing an equal level of safety, comfort and energy savings for skin doors.

The sash itself consist of a wooden frame, a 0.3 mm aluminium sheet and externally a 4.5 mm HDF board. The outside has a three layer protective treatment and is smooth and beautiful.

The energy performance for skin doors is also way above expected requirements.

Anti-theft features as standard

EASY FOR YOU DIFFICULT FOR THE INTRUDER

You can reduce the risk of burglary by making sure your windows and doors are fitted with the necessary safety devices. On windows and doors, Idealcombi has already done it for you as safety catches are standard on all Idealcombi's one-handle product series where windows and doors are equipped with very solid fittings offering a high level of protection against burglary.

All Idealcombi's one-handle doors are fitted with stay bolts, security strike plates, glued window panes and three-point closure, ensuring better sealing and ideal burglary protection.

Functions and accessories

Accessories may provide further options. Different handles, vents, steps, kick plates and receivers may be found in the large accessories stock from Idealcombi.

Idealcombi A/S

...innovation and quality

The history of the company

Idealcombi was founded in 1973 by two brothers, Bent and Henning Søgaard, and has experienced rapid growth in the three decades that have followed. The milestones have been many and important, and throughout the entire process, the brothers have stood at the helm with a hand in every detail of the development and with a solid understanding of the needs and movements of the market. From the early days in the barn on their ancestral farm until today when the high-tech company occupies over 115,000 m² of premises in Northern Jutland, Idealcombi has been a hive of activity. The next generation of the Søgaard family is already taking over the helm, ensuring that Idealcombi remains a family-owned company based in Denmark, with Danish workplaces and following the same stable and secure course.

Idealcombi

Idealcombi produce the most innovative products for entrance solutions with windows and doors in combined wood|PUR|aluminium. With our 4 strong and individual product series, we offer entrance solutions in high quality for all kinds of construction - for renovations, new constructions and extensions. Our product design range from conventional simple and timeless to the modern, slim and functional lines.

The innovative company

Innovation is a focus point in all work at Idealcombi, and we work continuously and targeted on being among the best, in the development of windows and doors of high quality.
